

Announcing the publication of

Sustainable Development Law

Principles, Practices and Prospects

Marie-Claire Cordonier Segger
and **Ashfaq Khalfan**, Directors of the
Centre for International Sustainable
Development Law

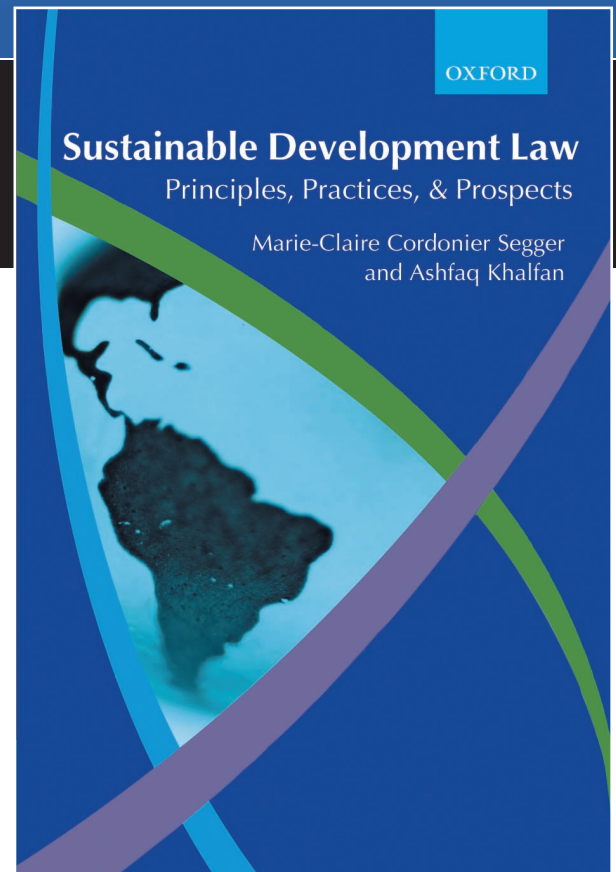

- The first work to provide a comprehensive guide to this vital new area of international law and policy
- Uses the emerging 'Sustainable Development Law' theoretical approach to analyse a series of practical case studies of legal instruments and offer a cutting-edge agenda for future research on sustainable development
- Offers comprehensive surveys of current developments, including an analysis of the 2002 World Summit on Sustainable Development
- Clearly structured teaching manual with practical case studies, solid references and sources of further information, the perfect sourcebook for Development Law

Comprehensive Coverage of the Law:

International Sustainable Development Law (ISDL) is one of the most vibrant new topics in international law, presenting a powerful, and contentious, challenge to traditional areas of social and environmental law. This book provides, for the first time, a comprehensive study of the principles and practical application shaping the development of this vital body of law.

Beginning with the historical origins of the idea of sustainable development, the book traces the gradual interweaving of diverse areas of environmental, economic and social law under the conceptual and practical framework of sustainable development. A series of case studies then analyse the key instruments in the establishment of sustainable development law in the international arena, and present research agendas to clarify and expand the prospects for its future development.

Clearly Structured, with detailed guides to the concepts used and where to go for further information, this will be the perfect teaching companion for years to come.
